EXPLANATION OF GROUP SYMBOLS BY TYPES OF TOBACCO
FOR PURPOSES OF THE TOBACCO STOCKS REPORT

GROUPS OF FLUE-CURED
TYPES 11, 12, 13, and 14:
A-Wrappers
B-Leaf and smoking leaf
C-Cutters
X-Lugs and primings
S-Scrap
N-Nondescript

GROUPS OF FIRE-CURED
TYPES 21, 22, and 23:
A-Wrappers
B-Heavy leaf
C-Thin leaf
X-Lugs
S-N-Scrap and nondescript

GROUPS OF BURLEY
TYPE 31:
B-Leaf
T-Tips
C-Lugs and cutters
X-Trash and flyings
S-Scrap
N-Nondescript

GROUPS OF SOUTHERN MARYLAND
TYPE 32:
B-Heavy leaf or dull crop
C-Thin leaf or bright crop
X-Seconds and ground leaves
S-Scrap
N-Nondescript

GROUPS OF DARK AIR-CURED
TYPES 35, 36, and 37:
A-Wrappers
B-Heavy leaf
C-Thin leaf
X-Lugs
S-N-Scrap and nondescript

GROUPS OF PENNSYLVANIA SEEDLEAF
TYPE 41:
B-Binders or tops
C-Fillers (farm wrappers)
X-Crop-run and stemming grades
Y-Farm fillers or ground leaves
S-Scrap

GROUPS OF OHIO FILLER
TYPES 42-44:
C-Fillers (farm wrappers)
X-Crop-run and stemming grades
Y-Farm fillers or ground leaves
S-Scrap

GROUPS OF PUERTO RICAN
TYPE 46:
C-Superior
X-Inferior
Y-Trashy (Rabia)
S-Scrap (Picadura)

GROUPS OF CONNECTICUT VALLEY
BROADLEAF AND HAVANA SEED
TYPES 51 and 52:
A-Wrappers
B-Binders, seconds, and brokes
C-Fillers and short darks
X-Stemming grades
S-Scrap

GROUPS OF NEW YORK AND PENNSYLVANIA
HAVANA SEED
TYPE 53:
B-Binders, seconds, and brokes
X-Crop-run and stemming grades
S-Scrap

GROUPS OF SOUTHERN AND NORTHERN
WISCONSIN
TYPES 54 and 55:
B-Binders
C-Fillers
X-Crop-run and stemming grades
S-Scrap

GROUPS OF CONNECTICUT AND GEORGIA
AND FLORIDA SHADE
TYPES 61 and 62:
A-Wrappers
B-Stout wrappers and binders
C-Fillers or tips
S-Scrap

GROUPS OF FOREIGN-GROWN CIGAR-LEAF
TYPES 81, 82, and 83:
A-Wrappers
C-Fillers
S-Scrap

STOCKS OF LEAF TOBACCO OWNED BY DEALERS AND MANUFACTURERS 1/

Leaf Tobacco Inventories Climb

Leaf tobacco inventories owned by dealers and manufacturers in the United States and Puerto Rico as of July 1, 1955, totaled 4,402 million pounds (farm-sales-weight) as shown by the quarterly Stocks Reports. This is a record high level of stocks as of July 1 and represents an increase of 318 million pounds compared with a year earlier. Considerably larger stocks of flue-cured and Burley types, the two major kinds of U. S. tobacco, made up most of the increase but stocks of most types were higher than a year earlier. Only about 50 million pounds, consisting principally of Maryland and Puerto Rican tobaccos, entered stocks during the April-June quarter. Only a small quantity of Maryland tobacco remained to be marketed after July 1 from the previous year's crop.

For the southern tobaccos, stocks of all types showed increases compared with the previous July 1. Flue-cured holdings were up 7 percent, Burley 11 percent, Maryland 7 percent, fire-cured 4 percent, and dark air-cured 4 percent. For the cigar leaf types, stocks of cigar filler leaf increased 8 percent over the level of stocks a year earlier. Conversely, holdings of the cigar binder types were slightly lower, and shade-grown stocks were about the same as on hand the previous July 1.

Included in the above total stocks as of July 1, 1955, were 882 million pounds (farm-sales-weight) of tobacco under Government loans. These stocks were divided as follows: flue-cured 330 million pounds, Burley 437 million, Maryland 13.0 million, fire-cured 51.5 million, dark air-cured 37.2 million, and cigar leaf 13.4 million. Total stocks of tobacco under loan a year ago were 639 million pounds.

1/ Figures quoted for type totals in this summary are the farm-sales-weight equivalent of reported stocks except foreign-grown leaf which is converted to an unstemmed equivalent basis only. Tables in the body of the report show stocks on a farm-sales weight basis; stocks in detail on a reported weight basis, subdivided according to recognized groupings; and stocks owned by dealers and manufacturers, separately. This report is issued quarterly.

CIGARETTE-LEAF STOCKS

Flue-cured, Burley, and Maryland at Record High Levels; Foreign-grown Also Higher

Stocks of flue-cured tobacco as of July 1, 1955, were up to the level of 2,056 million pounds--an increase of 141 million pounds over a year earlier. As indicated by changes in stocks, disappearance of flue-cured tobacco during the marketing year just ended (July 1954-June 1955) declined somewhat, totaling 1,173 million pounds compared with 1,209 million pounds during the preceding year. Domestic consumption declined to about 745 million pounds compared with 778 million during the previous year, while exports of 428 million pounds were slightly less than during the previous marketing year.

Burley tobacco stocks were at the high level of 1,473 million pounds as of July 1, 1955, an increase of 143 million pounds compared to the previous July 1 and also the highest level on record.

Maryland stocks as of July 1, 1955, of 73.8 million pounds represented an increase of 4.8 million over the previous July 1. Marketing of the 1954 crop of Maryland tobacco began in early May and sales prior to July 1 totaled 25.6 million pounds or about 1 million pounds more than was marketed during the corresponding period the previous season.

Stocks of foreign-grown cigarette and smoking tobacco of 172.5 million pounds were up 5.2 million compared with the previous July 1.

DARK TOBACCO STOCKS

Stocks of Fire-cured and Dark Air-cured Turned Upward

Fire-cured tobacco stocks were reported as 152.3 million pounds on July 1, 1955, showing an increase of 6.1 million pounds compared with a year earlier. Most of the increase was shown in stocks of Type 23 but holdings of Types 21 and 22 increased slightly. Virginia fire-cured stocks were reported as 28.8 million pounds, Eastern District Tennessee and Kentucky fire-cured 95.4 million, and Western District 28.1 million.

Inventories of dark air-cured totaled 86.2 million pounds on July 1, 1955, compared with 83.1 million a year earlier. Holdings of each of the dark air-cured types showed about the same percentage increase. Dark air-cured stocks were divided by types as follows: One Sucker 51.4 million pounds, Green River 29.9 million, and Virginia sun-cured 4.9 million.

CIGAR LEAF STOCKS

Stocks of Cigar Filler Types Higher; Cigar Binder and Shade-grown Show Only Small Changes

Dealers and manufacturers as of July 1, 1955, reported inventories totaling 366.9 million pounds (farm-sales-weight) of all types of domestic cigar leaf including Puerto Rican. This compares with 353.4 million pounds a year earlier. The level of stocks of foreign-grown cigar leaf of 17.5 million pounds did not change compared to the previous July 1.

Stocks of the cigar filler types of 218.4 million pounds were 16.8 million above inventories a year ago. This overall increase was about equally divided between Types 41 and 46 while holdings of Types 42-44 showed a small decrease. Stocks of Pennsylvania Seedleaf as of July 1, 1955, were 124.2 million pounds, Ohio Filler 26.0 million, and Puerto Rican 68.2 million. This is the highest level for Puerto Rican stocks as of July 1 in several years.

Stocks of the cigar binder types were 130.5 million pounds on July 1, 1955, or just slightly lower than the 133.6 million reported on hand the previous July 1. This is the lowest level in several years as of this quarter for stocks of the cigar binder types. Holdings of cigar binder types this July 1 were divided as follows: Connecticut Valley Broadleaf 35.5 million pounds, Connecticut Valley Havana Seed 26.7 million, New York and Pennsylvania Havana Seed 2.3 million, Southern Wisconsin 30.9 million, and Northern Wisconsin 35.0 million.

Stocks of the cigar wrapper types were 18.0 million pounds as of July 1, 1955, consisting of 11.1 million pounds of Connecticut Valley Shade and 6.9 million of Georgia-Florida Shade tobacco. These levels of stocks represented only very small changes compared with a year earlier. Disappearance of Connecticut Valley Shade during the past marketing year (July 1954-June 1955), based on changes in stocks, was 10.2 million pounds or slightly higher than the 9.9 million for the previous year. Disappearance of Type 62 was indicated at 6.4 million pounds compared with 6.0 million during the previous marketing year.

Stocks of Cuban leaf at 16.3 million pounds were about 0.8 million larger than a year earlier. Holdings of Philippine Islands (Manila) leaf as of July 1, 1955, went down to 0.9 million pounds compared with 1.7 million the previous July 1. Sumatra leaf stocks were only 0.3 million pounds.

TABLE 1.--*Average percentage of weight remaining after handling, sweating, drying, and stemming, and factors used for adjusting stocks reported by dealers and manufacturers to a farm-sales-weight equivalent, by types of tobacco*[1]

SOUTHERN TYPES (11-37)

Type	Type No.	Yield realized from farm-sales weight to—					Stemming		Factors used to multiply by to convert reported stocks of

[1]Information in this table taken from U. S. Department of Agriculture Circular 435, Tobacco Shrinkages and Losses in Weight in Handling and Storage, issued in July 1937. [2]Factors for converting unstemmed stocks to farm-sales weight are adjusted on the basis of an average loss on the reported weight and should not be taken as indicative of full shrinkage after handling, sweating and storage. [3]See footnote 1 on page 5 for conversion factors to farm-sales-weight equivalent for cigar leaf except Type 46. [4]Foreign-grown stocks not converted to farm-sales-weight equivalent.

Table 2.--Stocks of leaf tobacco owned by dealers and manufacturers, by types, converted to a farm-sales-weight equivalent, July 1, 1955, compared with other quarters 1/

FARM-SALES WEIGHT

Type name	U.S. type number	July 1, 1955	July 1, 1954	July 1, 1953	April 1, 1955	January 1, 1955	October 1, 1954

1/ For factor used in converting weights see table 1 except for cigar leaf. The instructions for reporting unstemmed cigar-leaf of the domestic types require dealers and manufacturers to indicate the weight basis on which the tobacco is reported, namely farm-sales weight, marked weight, or sweated weight. The stocks are converted to the farm-sales-weight equivalent on the basis of the amount reported in these three categories. The conversion factors by types of tobacco for July 1, 1955 are as follows: Type 41, 107; Types 42-44, 114; Type 51, 105; Type 52, 106; Type 53, 112; Type 54, 104; Type 55, 105; Type 61, 111; Type 62, 114. July 1, 1955, figures subject to revision.

2/ For explanation of stocks included in this classification, see footnote 4 on page 10.

3/ Foreign-grown leaf is converted to an unstemmed equivalent basis only.

* Revisions in April 1, 1955 report.

Table 3.-Production, stocks, supply, disappearance on a farm-sales-weight basis, and price of specified types, 1950-55 1/

1/ Subject to revision.
2/ Summary according to groups of grades reflecting a broad quality breakdown of total cigar leaf stocks.
3/ Includes Puerto Rican on the Island, Type 46.
4/ Although Type 73 is defined as all domestic types of tobacco not otherwise classified, the bulk of the stocks reported in this type consists of cuttings, clippings, and trimmings. This is the result, in most instances, of the inability of reporters to designate cuttings, clippings, and trimmings in the "S" group of the types to which they properly belong.
5/ Does not include Sumatra and Java leaf held for sale in the Free Trade Zone.

* Revisions in April 1 report.

1/ These statistics represent the quantity of leaf tobacco reported as owned by all leaf tobacco dealers, manufacturers, quasi-manufacturers, growers' cooperative associations, warehousemen, brokers, holders, and owners subject to provisions of the Tobacco Stocks and Standards Act approved January 14, 1929, and the amendments thereto passed in the 72nd and 74th Congress. The quantities owned by dealers and manufacturers have been tabulated separately on a type total basis.

2/ The quantities shown as owned by manufacturers include tobacco which is held under dealer registries of manufacturers and also tobacco held by dealers and known to be purchased on order for foreign or domestic manufacturers. The quantities shown as owned by dealers may include some tobacco held by dealers which is earmarked for sale to domestic manufacturers or for export. The table should therefore be considered as representing only the approximate quantities owned respectively by dealers and manufacturers.

3/ Includes stocks on the Island of Puerto Rico.

4/ For explanation of stocks included in this classification see footnote 4 on page 10.

5/ Does not include Sumatra and Java leaf held for sale in the Free Trade Zone.

Table 6.-Stocks of leaf tobacco owned by dealers and manufacturers, summary by types, July 1, 1955, compared with other quarters 1/

1/ These statistics represent the quantity of leaf tobacco reported as owned by all leaf tobacco dealers, manufacturers, quasi-manufacturers, growers' cooperative associations, warehousemen, brokers, holders, and owners except (a) the original growers of tobacco; (b) manufacturers who in the first three quarters of 1954, according to the returns of the Commissioner of Internal Revenue, manufactured less than 35,000 pounds of tobacco, less than 185,000 cigars, or less than 750,000 cigarettes, pursuant to the provisions of the Tobacco Stocks and Standards Act approved January 14, 1929, and the amendments thereto passed in the 72nd and 74th Congress.

2/ Subject to revision.

3/ For explanation of stocks included in this classification see footnote 4 on page 10.

4/ Does not include Sumatra and Java leaf held for sale in the Free Trade Zone.

* Revisions in April 1, 1955 report.
